

Program to understand all the arithmetic operators available in C++.

```
#include<iostream.h>

void main()
{
    int a = 21;
    int b = 10;
    int c ;

    c = a + b;
    cout << "Line 1 - Value of c is :" << c << endl ;
    c = a - b;
    cout << "Line 2 - Value of c is :" << c << endl ;
    c = a * b;
    cout << "Line 3 - Value of c is :" << c << endl ;
    c = a / b;
    cout << "Line 4 - Value of c is :" << c << endl ;
    c = a % b;
    cout << "Line 5 - Value of c is :" << c << endl ;
}
```

When the above code is compiled and executed, it produces following output:

```
Line 1 - Value of c is :31
Line 2 - Value of c is :11
Line 3 - Value of c is :210
Line 4 - Value of c is :2
Line 5 - Value of c is :1
```
